

### Greyline

# **SFM 6.1**

## Technical Specifications:

The Greyline SFM 6.1 Slurry Flow Meter works best in applications that would prove problematic for regular contacting flow meters. Since the sensor is mounted on the outside of a pipe, rather than directly contacting the material, it is unaffected by wear and tear of abrasive slurries. A non-contacting sensor means there is no interruption to flow and no pressure drop.

#### **GENERAL SPECIFICATIONS**

Flow Rate Range:  $\pm 0.038$  m/s to 12.2 m/s ( $\pm 0.125$  ft/s to 40 ft/s) in most applications

Pipe Size: Any pipe ID from 12.7 mm to 4.6 m (0.5 in to 15 ft)

±2% of reading or 30.5 mm/s (1.2 in/s) whichever is greater. Requires solids or bubbles minimum size of 100 Accuracy:

microns, minimum concentration 75 ppm. Repeatability: ±0.1%, Linearity ±0.5%

Display: 100-240 V AC 50/60 Hz (see Options), 2.4 to 5.6 W depending on options **Configuration:** Built-in 5-button keypad with English, French, or Spanish language selection **Power Input:** 100-240 V AC 50/60Hz 10 VA maximum. Optional: 9-32 V DC, 10 Watts maximum

Isolated 4-20mA (1  $k\Omega$  load max.) or 0-5 V DC (Field Selectable) **Output:** 

Qty 2, rated 5 A SPDT, programmable flow alarm and/or proportional pulse **Control Relays:** 

Data Logger: Built-in 26 million point logger with USB output and Windows software

**Enclosure:** NEMA4 stainless steel with window

**Electronics Operating** -23 °C to 60 °C (-10 °F to 140 °F) Temperature:

**Shipping Weight:** 6.3 kg (14 lb)

Approvals: CSA, UL/EN 61010-1

#### SENSOR SPECIFICATIONS

• SE4 single-head ultrasonic with 7.6 m (25 ft) shielded cable and stainless steel mounting kit for pipes 12.7 mm Model:

(0.5 in) ID or larger. Designed to withstand accidental submersion to 10 psi.

· Certified non-incendive for Class I, Div 2, Groups A, B, C, D hazardous locations Sensor Operating

-40 °C to 150 °C (-40 °F to 300 °F) Temperature:

**Exposed Materials:** 316SS

#### **POPULAR OPTIONS**

Intrinsic Safety Barriers for sensor mounting in Class I, Div 1, Groups C, D; Class II, Groups E, F, G; Class III; Encl. Type Sensors.

4 hazardous locations

**Industrial Automation** Modbus RTU via RS485 or HART (field selectable) Protocols:

15.2 m or 30.5 m (50 ft or 100 ft) continuous shielded coaxial pair, or splice up to 152.4 m (500 ft) with junction box. Sensor Cable:

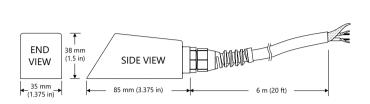

Self tunes to extended cable

**Enclosure Heater:** For outdoor installation, thermostatically controlled to -40 °C (-40 °F)

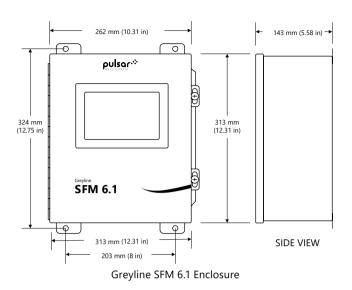

Steel, stainless steel, cast iron, PVC, fiberglass, any contiguous pipe material that conducts sound, including lined **Pipe Materials:** 

pipes with a liner bonded to the pipe wall

### Delivering the Measure of Possibility

Pulsar Measurement offers worldwide professional support for all of our products, and our network of global partners all offer full support and training. Our facilities in Malvern, UK and Largo, USA are home to technical support teams who are always available to answer your call or attend your site when required. Our global presence, with direct offices in the UK, USA, Canada, and Malaysia, allows us to create close relationships with our customers and provide service, support, training, and information throughout the lifetime of your product.

By taking a step forward in echo processing technology, Pulsar Measurement addresses applications previously thought to be beyond the scope of ultrasonic measurement. This technology improves signal processing at the transducer head which has made it possible to increase resistance to electrical noise, enabling the transducer to 'zone in' on the true echo.
